

B. Braun Sutures

Supramid

Your reliable partner for skin closure

Non-absorbable pseudomonofilament polyamide suture

Supramid

Your reliable partner for skin closure

Supramid combines in an optimal way monofilament and polyfilament benefits.

Profile

Supramid is a synthetic, non-absorbable pseudomonofilament with a core made of polyamide 6.6 and a cover of polyamide 6, available from USP 3 to 4/0.

For sizes USP 5/0 and 6/0 Supramid has a monofilament structure of polyamide 6.

Both structures available undyed white or black.

Ease of handling:

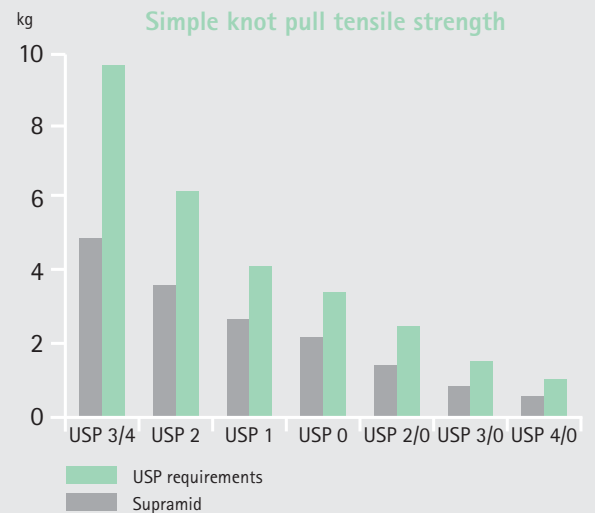

- Reduced tissue drag due to its sheathed structure and smooth surface
- High flexibility thanks to its braided core
- Reduced memory effect when pulling the thread out of the packaging
- Good knot holding abilities
- Uniform diameter all along the thread

High flexibility

High security:

- Knot pull tensile strength values substantially exceeding USP requirements
- No capillarity due to the outer monofilament structure with reduced risk of infection
- Excellent tissue compatibility

Your reliable partner for skin closure:

- Secure wound closure successfully applied since years
- Cosmetic results with white sutures concealing wounds whenever desired, or black sutures for better visibility at hidden body parts.
- Adapted sizes and needle range

Supramid is specially indicated for:

- Skin closure
- Ligatures

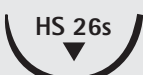

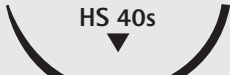

Product features	
Structure	Monofilament (USP 5/0 – 6/0) Pseudomonofilament (USP 3 – 4/0)
Chemical composition	Polyamide 6.6 (USP 3 – 4/0) Polyamide 6 (USP 5/0 – 6/0)
Cover	Sheath of white or black polyamide 6 (USP 3 – 4/0)
Color	White or black
Sizes	USP 6/0 (metric 0,7) to USP 3 (metric 6)
Knot tensile strength retention	Gradual loss of tensile strength at a rate of approx. 15/20% per year
Mass absorption	Non-absorbable
Indications	Skin, ligatures
Contraindications	Supramid is contraindicated when a long term wound support is required
Sterilisation	Gamma-Irradiation
